ABOUT ME

Hello, I'm Md Khalikuzzaman, a dedicated and passionate professional in the fields of networking and web services. With a strong foundation in both areas, I have cultivated a diverse skill set that allows me to excel in various technical endeavors.

I embarked on my professional career as a Network Support Engineer at Airmet Communications in 2017. During my time there, I honed my technical skills, delving into the intricacies of network infrastructure and troubleshooting methodologies. This experience provided me with a solid understanding of networking protocols, hardware components, and the art of providing efficient technical support.

In 2021, I transitioned to Search IT as a Network Engineer (NOC), where I continue to thrive. My responsibilities involve managing core networking technologies such as IPv4, IPv6, routing, VLANs, and VPNs. I have a knack for configuring and troubleshooting Cisco routers and switches, as well as handling devices from Mikrotik and Huawei. My expertise extends to designing and deploying Epon and Gpon networks, showcasing my commitment to staying at the forefront of technological advancements.

Additionally, I am a seasoned System Administrator, proficient in managing web servers running on Linux and Windows operating systems. I take pride in offering reliable and secure server solutions for a diverse clientele. My proficiency in various technologies, including Linux, WordPress, Node.js, MongoDB, and MySQL, enables me to deliver exceptional web services that cater to unique requirements.

Outside of my technical pursuits, I am an advocate for continuous learning and growth. I am passionate about staying updated with emerging technologies and innovative solutions that enhance the IT landscape. My collaborative approach and problem-solving skills have allowed me to contribute effectively to teams and clients alike.

Thank you for taking the time to learn a little about me and my journey. I am excited about the possibilities that lie ahead and look forward to further exploring the ever-evolving world of technology.

EXPERIENCE

2017 - 2020

Framer Network Support Engineer

Airmet Communications

My professional journey commenced as a Network Support Engineer at Airmet Communications in 2017. Here, I fortified my technical prowess, gaining hands-on experience in network infrastructure management, troubleshooting intricate issues, and providing comprehensive technical support. This role not only solidified my understanding of networking protocols and hardware components but also honed my ability to deliver timely solutions in dynamic environments.

2017 - 2023

Network Engineer (NOC)

Search IT

In 2021, I transitioned to Search IT as a Network Engineer (NOC), marking a pivotal point in my career. In this capacity, I have successfully managed complex core networking technologies, including IPv4, IPv6, routing, VLANs, and VPNs. My expertise extends to configuring, monitoring, and troubleshooting Cisco routers and switches, as well as effectively handling networking devices from Mikrotik and Huawei. I have played a key role in the design and deployment of Epon and Gpon networks, elevating network capacity and performance for enhanced user experiences.

2017 - 2023

System Administrator

Freelance

As a versatile System Administrator, I have adeptly maintained and administered web servers for a diverse client base. Proficient in both Linux and Windows operating systems, I have demonstrated a keen understanding of various technologies such as Linux, WordPress, Node.js, MongoDB, and MySQL. My commitment to server security, performance optimization, and seamless server management has fostered a reputation for reliability and excellence.

EDUCATION

2007 - 2008

Narayantola Mission High School

Sunamgonj

2009 - 2012

Hydergon High School

Moulvibazar

2013 - 2015

Longla Adhunik Degree College

Moulvibazar

My journey began with a Bachelor's degree in Business Study from Longla Adhunik Degree Collage. However, my curiosity and fascination with technology led me to explore the realms of networking and web services, where I discovered my true calling.

ACHIEVEMENTS

- Led the successful deployment of Epon network infrastructure, enhancing data capacity and network performance.
 - Played a pivotal role in resolving critical network outages, minimizing downtime and ensuring uninterrupted services for clients.
 - Received accolades for consistently surpassing performance targets as a Network Support Engineer at Airmet Communications.
 - Implemented robust server security measures, resulting in a notable reduction in potential vulnerabilities across multiple web servers.
 - Contributed to the optimization of network routing protocols, culminating in a substantial reduction in latency and improved data transfer speeds.
 - Designed and executed a comprehensive backup and disaster recovery plan, safeguarding critical data and minimizing risks for clients.
 - Instrumental in the smooth migration of client websites to new hosting environments, ensuring seamless transitions and zero data loss.
 - Recognized for exceptional problem-solving during critical incidents, expediting resolutions and minimizing client impact.
 - Demonstrated leadership by mentoring junior team members, fostering professional growth within the team.

This amalgamation of experience and accomplishments is a testament to my commitment to excellence and continuous growth. I am dedicated to harnessing my skills to drive innovation, streamline operations, and contribute positively to any team or project I am part of.
